## NEW HIALEAH FIRE STATION HAS A GREEN FLARE!

### Hialeah, Florida –

Mayor Julio Robaina, the esteemed City Council and the City of Hialeah Fire Department invite to come celebrate the grand opening of Hialeah's brand new, "green" fire station.

The fire station was fully remodeled to accommodate the firefighters with individual dorm rooms, bath rooms, a modern kitchen, and a state of the art computer system to better serve our community. The newly remodeled station will be unique in its own way because of the advanced foam insulation used within its structure. Foam insulation is superior to other insulation options because it expands and adheres to any sealing surface applied against air infiltration. An average building with fiberglass insulation will have to cool the air more often since there is no seal, and an average South Florida attic can heat up to 140 to 150 degrees Fahrenheit. Moreover, a large percentage of heat escapes through the attic of a building. By applying spray foam in an attic, the interior cools and the A/C units work less to maintain the temperature at a comfortable degree.

**When –** Wednesday, September 23, 2009 at 10 a.m.

**Where –** 23 Street and 8 Avenue
